Germantown, WI 53022

Joe,

Thank you for helping Mortgagebot with the RFP for all of our Wireless devices. In choosing US Cellular as our primary provider for Smartphones, aircards and standard phones, Mortgagebot ended up with outstanding customer service and all new devices that successfully met our needs. The end results of K-Consult running with this Wireless RFP include:

- Annual cost reduction of over \$6,000 (\$500 per month) in recurring costs for ALL wireless devices.
- Annual savings of approximately \$1,700 annual savings in dropping 3 unneeded aircards.
- A \$1,100 back-credit from Verizon for past over-billing on our aircards.
- A significant increase in the total number monthly user minutes at no additional cost.
- Two free months of service with US Cellular to cover any Verizon early termination charges.
- Smartphone Upgrades to Blackberry Curve's or Blackberry Pearl's on all our existing Motorola Q's at a cost to us of 1 cent per device.
- Free BES Server software and 20 free CAL's.
- One year of free T-2 support with RIM paid for by US Cellular
- Over \$700 trade-in credit for our old Motorola Q's through a US Cellular program with RIM.
- Better customer service to our account from a US Cellular sales rep, who has only 200 accounts as compared to our Verizon rep who was servicing over 500 accounts.

Thank you for working with all potential vendors, gathering the information, and summarizing the options in a clear, concise way. Your services armed Mortgagebot with all the tools necessary to select an appropriate wireless vendor.

Respectfully,

Corey Peissig
Vice President & Director of Technical Operations
