Mr. Joseph Kitzinger  
K-Consult  
N108 W16076 Carriage Ave.  
Germantown, WI 53022

Joe,

Thank you for your consulting work in helping Orion get the right solution and the right price for connectivity between our Grafton, Wisconsin and Columbus, Nebraska plants. As you know, our ERP system and business is reliant on the uptime and speed of this circuit. The new point-to-point T-1 is the right choice for Orion.

Our original expectations that we laid out were to:

- 1) Improve the speed of the existing Norlight Frame Relay circuit.
- 2) Cut the current cost of the existing circuit.
- 3) Keep the reliability and uptime of the circuit.

You accomplished all three of our goals and on top of that got SBC to cave and give us 3 year pricing on a 2 year term. With bandwidth costs continuing to decline each year, this is a huge benefit for Orion to not be locked into contracts any longer than needed.

Thank you
