Joe

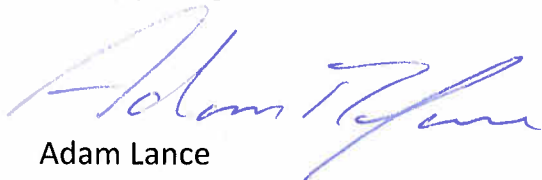

I just wanted to shoot you a quick note as a thank you for your Telecom Audit work for P&H Mining Equipment. Your audit on just some of P&H Mining Equipment's AT&T and Qwest bills ended up saving us over \$24,000.00 annually.

Your expertise, pin-pointed 2 circuits that we were unknowingly paying expensive month-to-month rates on. Getting both of these circuits (an ISDN PRI and Point-to-Point T1) back under contract accounted for over \$22,000.00 of the annual savings or about \$1,900.00 per month alone!!!

You also found some smaller stuff, an ISDN BRI in our Mesa, Arizona MinePro location that we no longer needed and got rid of a couple of those nasty third-party charges that sometimes show up on our bills. Thank you.

Lastly, you also got Qwest to give us a 20% discount on our 14 analog lines at the MinePro location and as an added bonus, you persuaded Qwest give us a one-time back-credit for over-charges on these lines of \$1,003.44. And to top it off, you let us keep the \$1,003.44 credit!!!

Thank you again

Adam Lance
